

The Gamma LED Series

The 25mm and 32mm Gamma LED series was primarily design for indoor single sided and double sided display applications. With its stylish and elegant monolithic design it promotes class to any product or promotion.

The 25mm Gamma can be wall flush mounted, recessed or cable/rod mounted or even built as a free standing display.

The edgilit logarithmic lighting system used in the Gamma series surpasses others in brightness and colour rendering quality using cutting edge high

quality LED illumination technology achieving approx. 100,000 hours of illumination, with low power consumption and generating virtually no heat.

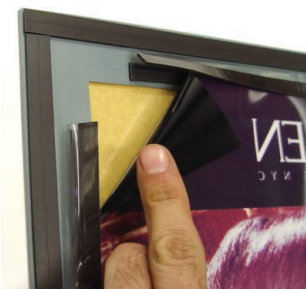

Australian designed & manufactured, all of our Gamma series units comply to Australian/NZ electrical standards, using Australian approved electrical components.

The Gamma LED Series is a 100% mercury FREE product. Backed with a 3 Year return to base warranty.
